The Ultimate Layout Tool...

- Produces accurate plans
- Fully dimensioned drawings and layouts
- Clear instructions and labels for fitters, plumbers and electricians
- Calculates benchtops, cornices, pelmets and plinths

The Ultimate Pricing Tool...

- Accurately prices the design not just in one range, but across several at the press of the button
- Component pricing that really works
- Produces component purchase orders right down to the last handle
- Produces quotations, estimates, invoices and supplier orders in minutes

ArtiCAD-Pro

Input Simple - Output Stunning

Easy to Master

So fast, you'll be signing orders whilst others are still trying to draw their design! Design alterations and corrections also couldn't be faster and easier - ArtiCAD is ideal for producing designs in the presence of a potential client, with confidence.

Faster Designs

So easy, you won't believe it ArtiCAD can be swiftly mastered and enjoyed by the completely novice computer user and the highly experienced CAD user. Complicated tasks are made easy with ArtiCAD so time savings are even greater plus a wealth of advanced design features inspire even the most experienced CAD users and computer enthusiasts.

Unparalleled Capability

The textures and colours of your choice can be attributed to any surface in an ArtiCAD design, doors, walls, floors, tiling, appliances, accessories etc. resulting in the ultimate freedom for the designer. You can also easily add your own texture finishes to ArtiCAD's existing library of texture finishes from woodgrains to curtain fabrics, with stunning results just by using a colour scanner or digital camera or importing bitmaps from other sources. ArtiCAD gives the designer control.

System Output

All images created in ArtiCAD can be saved to the ArtiCAD image library and are very easily reproduced or presented in the designer's chosen format.

Detailed, dimensioned plans & elevations – perfect for presentations and for fitters, ArtiCAD's plan drawings are refreshingly clear to visualise.

Photo-Realism (Pro system only) – superb presentations are the result of meticulously detailed 3D graphics and the ability to apply whatever colour or texture the designer chooses to any surface in the design. Changing colours and textures also couldn't be easier or faster. A simple to use yet highly sophisticated lighting editor produces amazing effects and swiftly brings designs to life.

Perspectives – stunning line drawings look great in black and white but can easily be hand-coloured for that individual presentation.

Birds-eye Views – impressive views are generated at the press of a button.

Walk-through – simple to create and quick to reproduce, an ArtiCAD slide show is sure to impress a potential customer.

Virtual Reality – Arti-VR is a superb optional addition that's not just a gimmick. Show clients their room design in the highest quality VR walk-through

or save the design in VR mode and simply email it to your client or put it on a floppy disk and post it! Your customer doesn't need to have ArtiCAD installed on their own PC in order to 'walk through' their design and they will have full control of movement and direction – **FANTASTIC and HIGHLY EFFECTIVE!**

Sketch Rendering – Arti-SKETCH is a must-see optional addition. No less than 13 stunning presentation choices. Very, very impressive black and white presentations plus colour options. Favoured by designers of higher-value and bespoke kitchens, bedrooms, bathrooms and studies – **ONE LOOK AND YOU'LL SEE WHY!**

Complete and component pricing – ArtiCAD's powerful pricing module efficiently handles multiple manufacturer and component pricing. The pricing module will produce quotations, invoices, orders etc. and is easily customised to incorporate specific template requirements.

Interface the data with QuickCAM and CADCode to produce the most advanced manufacturing automation, parametrics and machine control.
